25X1

1. A detailed report on the undamaged fuel dump located near the Dresden (A 52/F 29) Albert Harbor, formerly a "Shell Main Fuel Depot," was previously transmitted. A sketch of the installation was attached to another report.*
2. The capacities of the individual fuel tanks (para d) are not known. The total storage capacity of this installation is estimated to be at least 50,000 cubic meters.
3. Reliable information on the amount of fuel now in storage there (para e) is lacking. The storage capacity of the installation is said to have been 75 percent utilized in early 1950.
4. The daily, weekly or monthly consumption rate (para h) is not known. About 20 to 30 railroad tank cars reportedly arrive at the installation. Roughly estimated, this amount may be considered to be used daily.
